ABOUT ME

I'm Abdi Zamed Mohamed, a resourceful and self-taught full-stack developer with an enthusiasm for developing imaginative digital solutions. Through 3+ years of practical experience, I've honed my skills in transforming creative concepts into tangible software products. My journey has been marked by opportunities, I am dedicated to creating meaningful software solutions that cater to user requirements and technological innovation.

EDUCATION

Mujamac Taiba

Primary
Education

2012 - 2018

Al Fajr High School

Secondary
Education

2018 - 2020

Jamhuriya University

Bachelor of Computer
Application

2020 - 2024

EXPERIENCE

Mobile App Developer February 2023 - Present

Bixi LTD, FinTech Co.

I played an instrumental role in the development of **eDir app v2**, significantly enhancing the user experience and simplifying money management processes. One of my standout innovations was the introduction of a novel digital money exchange method, allowing users to transact money online seamlessly via our platform. Moreover, I leveraged React Native in the application's development, ensuring it remained user-friendly and secure. In my role, I also collaborated intensively with multiple teams, ensuring that we struck a perfect balance between the business needs and user requirements. I was deeply committed to quality assurance, frequently conducting code reviews to ensure the application's integrity and that it adhered to the highest industry standards. Another noteworthy contribution was the integration of the **FaceTec 3D** feature, a cutting-edge security measure that verifies the physical presence of a user, adding an extra layer of security to our application.

SKILLS

- JavaScript / TypeScript
- C#
- ASP.net
- React (Next.js)
- React Native
- Nodejs (Nest, Express)
- Go
- PostgreSQL, MongoDB, MySQL
- UI / UX
- GraphQL
- Docker

LANGUAGES

- English
- Somali

Full Stack Developer **March 2022 - August 2022**

Silicon LLC, Tech Startup

I once worked in Silicon LLC where I developed a robust e-commerce administration platform. This platform was crafted using React.js for the frontend and C# with ASP.NET for the backend. One of its notable features includes CRUD operations for various tables, which allows easy management of data. To streamline the deployment process and ensure regular updates without disruptions, I integrated CI/CD pipelines. Furthermore, understanding the importance of security in e-commerce, I implemented Role-Based Access Control (RBAC). This feature enables granular control over permissions, ensuring only authorized personnel can access specific functionalities. This holistic approach guarantees not only a user-friendly experience but also a secure environment for both administrators and customers.

.NET Freelance Developer **March 2021 - Feb 2022**

Freelance, Tech Startup, Remote

During my freelance tenure, I've had the privilege to work remotely as a .NET Developer, collaborating with diverse clients and cross-functional teams from all over the world to bring innovative ideas to fruition. I've been instrumental in the design, development, and deployment of robust and scalable applications for various projects. With a deep expertise in a multitude of programming languages and frameworks, I consistently deliver efficient and user-friendly solutions tailored to meet the specific needs of my clients.

PERSONAL PROJECTS

E-Learning Platform for Somalia

Project Overview:

The E-Learning Platform will be a web-based application accessible from various devices, ensuring flexibility and convenience for students and educators alike.

The platform will offer a diverse range of courses, covering subjects from core academic topics to practical skills, catering to learners of all ages and backgrounds.

Interactive and engaging content, including video lectures, quizzes, and assignments, will be incorporated to enhance the learning experience.

Progress tracking and performance evaluation features will allow students to monitor their growth and grasp of the material.
